DigitalHouse 2023 - 2024
- **HTML & CSS**  
Google Activate 2021 - 2023
- **Python**  
Self-taught - no certification
- **Degree in Medicine**  
Universidad Nacional de Córdoba

## ABOUT ME

Junior web developer with a solid foundation in JavaScript, HTML and CSS, and fundamental knowledge of Python and Java. Passionate about backend development and committed to creating complete solutions that span from initial idea to final implementation.

## RELEVANT PROJECTS

- **Streang**

E-commerce platform developed in a full-stack course, where although it was a team effort, I took the role of leader. I was in charge of organizing the team and distributing tasks. Contributed to the frontend using HTML, CSS and JS, and to the backend implementing CRUD operations with Express, Sequelize and MySQL.

- **Santa Barberia**

Website for a barbershop that allows customers to schedule appointments quickly and automated. I developed the project from start to finish, handling design, coding, and integrating external services such as Calendly and Google Sheets APIs to facilitate shift management.

- **Other projects**

I have developed other web projects, with different purposes. For more information on these, and those mentioned above, visit my site.

## WORK EXPERIENCE

- **Emergency physician**

Sanatorium Mayo, Córdoba, Argentina - 2022 to 2024

- Provided medical care in high-pressure situations.
- I developed skills in making quick and effective decisions.
- I worked in multidisciplinary teams to ensure the best patient care.

## IDIOMAS

- Native Spanish
- English: Advanced level, able to communicate fluently and clearly.
